

Github Instructions

1. Copy link
2. Go to file folder where you have the game or create a new folder if first time
3. Right click select "open GitBash here"

4. In gitbash write "git clone *copied link here*" *ctrl + v does not work interminal you have to right click paste."
5. Every time one of us makes a change in the game, when we are done we need to make another repository that only includes the changes we made.
